RE: Satellite Change Notification -- TVE (Televisión Española)

Dear Sir/Madam,

This letter is to inform you that TVE (Televisión Española) is transitioning from Intelsat Galaxy 23 to a new carrier in April 2020. Please look for future communications in the coming weeks with detailed information regarding this transition.

You will receive the new **DEC 5005** family of HEVC IRDs along with authorized CAM modules before the end of July, if you have not already.

In our effort to avoid any signal disruptions to your customers and our viewers, we strongly encourage all our distribution partners to begin testing the new IRDs and ultimately make the transition to these devices in a timely manner.

The new receivers are multi-signal DVBS2 compatible and are also capable of down-converting HD channels

Please forward this letter to all appropriate parties in your engineering and technical departments. For any questions or issues pertaining to this transition please contact us at (770) 396-7850.

Sincerely,

U.S. Commercial Representative, RTVE
